MCSE TCP/IP Exam Cram 3E (Exam: 70-059)

Synopsis

Contains all of the curriculum objectives of the TCP/IP exam #70-059 and serves as a complement to the TCP/IP Exam Prep. Provides two complete, revised, practice exams featuring questions designed to assess the reader's readiness to take the exam, and the answers and explanations that reinforce the reasoning behind the correct answers. Updated content includes a new 32-page scenario section designed to prepare the reader for scenario-based questions on the actual exam. Includes updated content that covers all the exam formats. Contains unique editorial content that serves as an ideal complement to all study guides, training courses, and materials.

Customer Reviews

After having read Microsoft's Internetworking with TCP/IP and being thoroughly confused, this book helped me to put it all together. Although not designed for beginners it does explain things in a very clear manner and many times gives the whys of something (the Microsoft text did not). However, I recommend that this be used only as a supplement or review because it is not sufficient enough as a stand-alone product.

I cannot say enough about this book. I studied last night and passed the exam today with flying colors. It is that good!

This Exam Cram is well worth the money. I would not recommend it as the only book for study unless you are already very familiar with tcp/ip. It had the jist of what was important to know for the exam in a no fluff just the facts presentation. This is the kind of book that I read once, then go back and highlight lines that I feel are critically important to learn and keep studying from there. This is the kind of book to take everywhere with you - going to the dentist, great you can bone up on dhcp and dns while waiting for your turn in the chair. The book is probably worth the price for the practice exam questions alone. There are two sixty question practice exams in the back of the book that each have an explantion of why a particular answer is right and the others are wrong. When you really feel you know tcp/ip then try out the thirty scenario questions at the back of the book - they will really challenge what you have learned and are very similar to what is on the exam. Exam Cram TCP/IP is a great supplemental study guide for an important topic.

I read this book on Monday and Tuesday; Wednesday I scored a 966 on the exam. Read this book and do the practice questions and your all set for the exam. It's just that easy!
