Grade Level: Preschool - 3

## Customer Reviews

My son was having some issues when it came to learning about the Earth, and understanding all of it's layers. We loved this book! It was very easy for my son to understand the points, and he learned quickly what the school material had complicated for him. With beautiful photos, and excellent illustrations, I would recommend this book to anyone.

I bought this book for my 6 year old granddaughter & read it to her. She really loved it! By nature she is very curious about science and nature and really appreciated the clear explanations and graphics (as did I)!

I have been searched for a book for 2nd graders that would be reader friendly and not too "over their heads". This is a great book and the illustrations are very nice.
