Age Range: 8 - 14 years

Grade Level: 3 - 4

## Customer Reviews

I purchased the entire series of these books for my first grader son after he found one at the local library. They are an easy to read graphic novel format with the same look as superhero comics. Using bright colors, action scenes and simple language they explain some basic scientific concepts in a way that children can not only understand but enjoy. As I hoped they got my son interested in knowing more about the topics. Definitely worth the money and fun to read even for adults unfamiliar with the topics themselves.

The idea of these books is great, but they need to make the book longer with more of a plot so that children have time to get into the adventure and learn the information.

My wife uses these in her 5th grade classroom and the students really like them. She found it

especially useful with reluctant readers.

The series is a great intro to science - not comprehensive, but enough to get a kid introduced to the topic in a fun way.
