Age Range: 8 - 12 years

Grade Level: 3 and up

Customer Reviews

You've probably heard of those 101 Dalmatians or, if you're old enough, even those 76 trombones and the big parade. No matter what age you are there are plenty of wow facts in the book that even big kids will enjoy. If you have a little time on your hands (pun intended) and want to learn all kinds of fun and funky facts you'll be mesmerized by "Time's Big Book of When," a book filled with 801 facts. There are also loads of great activities to try out. Ever want to know how a rocket works?

There's this really cool activity that will help you understand the science behind it. You only have to gather up a few basic supplies, the assistance of an adult, and you're off! This eye-popping book will keep you turning the pages and you'll even learn when the Earth will end. Not to worry because you'll learn that it will take "another 5 to 7 billion years" for the sun to stop burning. The "when" facts include the topics of time, animals, communications, flight, energy, the solar system, the digital age, food, transportation, civilizations and sports. Each question is answered on a two-page, eye-popping spread of facts. In the front youngsters will learn how to use the book, but I can almost guarantee that this page will be skipped because the inside of the book is quite enticing. A very thorough index can point the way to high interest topics or browsers will simply start flipping those pages. I'd move from page to page in a manner similar to the 'choose your own ending books,' flipping here and there. Each two-page spread glowed with excitement of one sort or another and even topics I tend to shy away from drew me in. Each one of these "When" questions could easily lend itself to becoming a stepping stone to a report.
