# Oscar And The Cricket: A Book About Moving And Rolling (Start With Science)

## Synopsis

Start with Science books introduce kids to core science concepts through engaging stories, fresh illustrations, and supplemental activities. One day Oscar sees a ball in the grass. "Try pushing it!" says Cricket. Oscar learns that the ball rolls slowly in grass and faster on a path, until it bounces off a tree and changes direction. Some things need a push to move, and others use their muscles to move themselves " and to move plenty of other things, too.

## Book Information

Series: Start with Science

Paperback: 32 pages

Publisher: Candlewick (September 22, 2009)

Age Range: 4 - 8 years

Grade Level: Preschool - 3

## Customer Reviews

I love this book! It is very educational and gives ideas to teach children about push, pull, and how objects move. I would highly recommend this book for teaching preschoolers.

This book is a fun introduction to science! I love books that show kids that learning is fun and engaging and doesn't have to come from a stuffy text book. And this book points out how simply things can be explained too! Way to go!

My students in Pre-K thoroughly enjoyed the characters.

My 3 year old love the Oscar books. They are written well and explain scientific principles in easy to understand terms. My son frequently request the "Oscar books" at bedtime and they have become a favorite for giving as gifts.
