Day Light, Night Light: Where Light Comes From (Let's-Read-and-Find-Out Science 2)

Synopsis

Moonlight is really sunlight! Did you know that the moon doesn't make its own light? Instead, it receives light from the sun and reflects it to us on the Earth. Read and find out about how the sun, the stars and light bulbs make light so we can see. Did you know that moonlight is really sunlight? The moon can't make its own light, so it receives light from the sun and then sends it to us here on the Earth. Any child who's ever wondered about the fascinating properties of light will want to read this classic science title. Readers will even learn how fast light can travel: from the moon to the Earth in less than three seconds! Veteran science author Franklyn M. Branley's lively text and Stacey Schuett's new illustrations combine fun facts and hands-on activities in this accessible introduction to the science of light. Book Information

Lexile Measure: 630L (What's this?)

Series: Let's-Read-and-Find-Out Science 2 (Book 1)

Paperback: 32 pages

Publisher: HarperCollins; Revised edition (January 3, 1998)

Language: English

ISBN-10: 0064451712

ISBN-13: 978-0064451710

Product Dimensions: 9.8 x 0.1 x 8 inches

Shipping Weight: 5 ounces (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars [See all reviews](#) (4 customer reviews)

Best Sellers Rank: #273,321 in Books (See Top 100 in Books) #132 in [Books > Children's Books > Education & Reference > Science Studies > Physics](#) #221 in [Books > Children's Books > Education & Reference > Science Studies > Astronomy & Space](#) #3946 in [Books > Children's Books > Science, Nature & How It Works](#)

Age Range: 4 - 8 years

Customer Reviews

As usual, Branley has presented science in a clear and very readable format. However, Day Light, Night Light has a limited content scope--natural and man-made sources of light and seeing objects from reflected light. Other books in this "Let's read and find out science" series have a much broader usability because of the excellent content which stretches their appropriateness higher than the reading level of the text. I often look for books by Branley and others in this series for my curriculum development work.

My kindergarten granddaughter wanted to know more about light. I just happened to be doing a unit on night/day at school We read this together and she was interested. definitely has to be a read aloud for kindergarteners. But, it introduces light sources well.

My son loves the book and little did he know that it was bought as a school book. good book

Yes I loved it, I got it for my lesson plan project.
