Age Range: 5 - 8 years

Grade Level: Kindergarten - 3

## Customer Reviews

There are a number of things that make this series very good for both educational purposes and pleasure reading. First, the design is attractive and easy to follow. The organization works especially well for a teacher who wishes to cover certain aspects of fall in an orderly manner. I also appreciated the use of a table of contents, glossary, index, and additional resources. Each book also contains an activity that goes along with the information covered in each book. The second thing I like is the friendly and appealing illustrations. The illustrations are very child friendly. I also enjoyed the text which is simple enough for younger readers, but also includes side notes for readers who want more information. The text is written as a narrative which makes for a good read a loud. I highly recommend this series for all those that want to learn more about fall. I liked the fact that I learned some things from these books that I did not know previously. For example, I did not realize that when apple seeds are planted the apples they produce are not the same variety of

apple as the seed that was planted. Lots of interesting things to learn in these books.

Easy way for young children to understand the different seasons and how they develop. Good review on the different clothes used during a year.

Bought for my classroom my students will love it.

Great for children, really good information about fall and perfect for a fall themed lessons
