Customer Reviews

This coloring book is a wonderful way for children to learn about great art. It was so interesting and fun to see how my children, ages ranging from four to twelve, colored great works of art as they asked what each one was about. We all enjoyed learning more about art, religion, and history. I did not feel it best to expose my children to some of this book. The good in the book is well worth editing some.

I had the impression when I ordered this book that it would have copies of familiar art from the Renaissance (the Mona Lisa, etc) but instead it's a conglomeration of pictures depicting events from the time. Not useful for the project I had in mind with middle school students.

We have this book, and along with Renaissance Women, it's a fantastic beginner's overview of the most important time in the history of Art and Science. All the history and facts packed in around the

lovely drawings makes this a great teaching toy - our kids are fascinated and always end up looking up the pages' subjects to learn more. They like to look up the original work of art or photos of cities to color the pictures the same way - another opportunity for learning that's so stealth they don't know they're learning a skill - they just think they're having a blast! We love all of the dozen or so Bellerophon books we've gotten so far.

As a travel writer of travel guides for children, I am always looking for ways to help a culture and country come to life for children. This is an excellent way to introduce children to the renaissance style of art. I used it with my own children who were 5 and 7 at the time before a trip to Rome. They enjoyed the paintings in person so much and recognized some from this coloring book. Now I recommend it to all my clients while designing trips for them. This belongs on the book shelf of teachers and parents alike!
