Biology (The 100+ Series™)

Synopsis

Biology for grades 6 to 12 is designed to aid in the review and practice of biology topics such as matter and atoms, cells, classifying animals, genetics, plant and animal structures, human body systems, and ecological relationships. The book includes realistic diagrams and engaging activities to support practice in all areas of biology. The 100+ Series science books span grades 5 to 12. The activities in each book reinforce essential science skill practice in the areas of life science, physical science, and earth science. The books include engaging, grade-appropriate activities and clear thumbnail answer keys. Each book has 128 pages and 100 pages (or more) of reproducible content to help students review and reinforce essential skills in individual science topics. The series is aligned to current science standards.

Customer Reviews

The worksheets are probably pretty good, as such things go, but you cannot use this as a stand alone workbook. It is a book of supplementary worksheets to be used with another textbook or program. This was not explained in its description. So it was a waste of money for what I needed it for: a quick review of biology topics, concepts and processes.

It is mostly worksheets that I can't really use. I was looking for something else but this don't even have good directions. It does not have lessons on t is just worksheets.

I have used some of these activities to differentiate instruction with success. Others are good reinforcement activities for all levels

I'll use much of the information in the book. There are some good illustrations.
