My son loves his copy of Lego Man in space--this is a great book for kids (ideally ages 5 to 10). The story line is easy to follow and inspires creativity as it includes instructions on building your own makeshift spaceship and parachute for Lego men. As the vibrant illustrations are an important part of this book, I have included a video for you to check out. A fun read that I definitely recommend to parents and teachers for their kids.

Our 3 year old son has enjoyed this book ever since we checked it out from the library. We wanted him to have his own copy. That's what he wanted from Santa. He loved the surprise. It is a great story.

Well written and very clear for children to understand. Well illustrated and great photos too. This

book is certain to inspire many more such backyard journeys of discovery!

Our 4 & 6 year old sons love this book! They love everything Lego and this book is the perfect reading level for our 6 year old! Currently his favorite book!

Gift for my nephew. It's Lego Man, of course it's awesome and he will love it.
