## Customer Reviews

I have twin 2.5 year-old boys and they love this book. Because of this book, when we are out driving around, they will tell me when they see a backhoe, a paver, or any other machinery they recognize. We read this book 3-4 times a day and it is new and exciting each time!

We bought this book for my son based on a recommendation from a friend. He love it! If your child enjoys trucks and construction sites, this is a must own! At first we read this over and over and over, now it's at least a once a day book. He points out and names the trucks and the automobiles. The pictures are fun (and I love that there is a female construction worker!) and entertaining. I HIGHLY recommend this book!!

He doesn't get sick of it! He loves pointing out all the different types of trucks, finding the boss, and talking about the road builders going to build their next road.

This is "The Favorite" book in our house! We first started reading this to our son when he was 2. Now he is 5 and still loves it. Our second son is now 2 and it is his favorite! The illustrations are the best around and the story is easy for kids to understand. We have learned about the different kinds of construction vehicles and what they do. The boys are able to name the different kinds of trucks when they see them on the road. I have bought this books for many of my friends who have recently had baby boys so they can enjoy it to!

If your little one is interested in construction machines, this book is a must. It is great. My boy memorized the words to this book when he was three and it helped him learn to read. The pictures are wonderful-- colorful and cartoonish yet very detailed as well.

Children love to learn how things work and a family favorite for this will always be Road Builders by B.G. Hennessy and pictures by the fantastic Simms Taback. The book details the building of a road and each truck's job "the backhoe digs" in doing so. The story and illustrations are simple but also completely engaging in their dedication to the machines. This book is memorable, to me, because it features a female construction worker and also shows the road completed and the arrival of "vans, taxicabs, delivery trucks". A delightful example of cause and effect.

I bought this book second hand for 1.50 and wow, 1 year later it is still his favorite book. Our copy is held together with packing tape and glue. Every time I get bored with it and hide it, he still manages to find it. My two year old will never part with his road builders book

I bought this book from thrift\_book. The condition of this book described as: Used - Very Good. When I received this book, it was junk and ended up in the trash. The store description was NOT accurate. I was disappointed and wasted my shipping money :(Road BuildersHennessy, B.G.Sold by: thrift\_books\$0.01Condition: Used - Very Good - Book has appearance of light use with no easily noticeable wear.
